                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RESULT 39
s10332
ubiquitin / ribosomal protein CEPS2 - common tobacco (fragment)
N;Alternate names: ubiquitin fusion protein
C;Species: Nicotiana tabacum (common tobacco)
C;Date: 31-Dec-1990 #sequence_revision 31-Dec-1990 #text_change 09-Jul-2004
C;Accession: S10332
Nucleic Acids Res. 18, 4007, 1990
A;Title: Sequence of a ubiquitin carboxyl extension protein of Nicotiana tabacum.
A;Reference number: S10332; MUID:90326543; PMID:2165257
A;Molecule type: DNA
A;Residues: 1-74 <GEN

-!- FUNCTION: Receptor for TNRSF134/BLyS/BAFF and TNFSF13/APRIL.

Promotes B-cell survival and plays a roll in the regulation of humoral immunity. Activates NF-kappa-B and JNK.

-!- SUBGNIT: Associates with TRAFI, TRAF2, TRAF3, TRAF5 and TRAF6.

-!- SUBGNILUAR LOCATION: Type III membrane protein. Plasma membrane and perinuclear Golgi-like structures.

-!- TISSUE SPECIFICITY: Expressed in mature B-cells, but not in T-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      cells or monocytes.
-!- DISEASE: Involved in a form of T-cell acute lymphoblastic leuk (T-ALL) by a chromosomal translocation t(4,16) (q26,p13) which involves TWRRSF1 and IL2.
-!- SIMILARITY: Contains 1 TNFR-Cys repeat.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Breakpoint for translocation to form IL2/TNFRSF17 oncogene.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              GO; GO:0016021; C:integral to membrane; TAS.
